DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in —

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a);

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Wu. Per claim 1, Wu discloses a detachable connector for a lamp on a pendent lamp comprising: a holder (3 and screw) being tubular and having a central chamber with an inner open end and an outer open end; a socket 36 detachably attached to the inner open end to electrically connect to a power source; an attaching device with elements (e.g. the wall of the socket, the screw-hole in the holder, the screw) formed on the socket and the holder that connect to each other to hold the socket on the inner end of the holder; a plug 42 corresponding to and selectively inserted into the socket to electrically connect to the socket and electrically connected to the lamp of the pendent lamp; and a connecting tube 4 securely attached to the plug and connected to the lamp of the pendent lamp.

Allowable Subject Matter

Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Regarding claim 2, the prior art does not suggest the connector for a lamp as claimed, including the combination of all the claimed elements, the combination including that the attaching device comprises the two first ears, the cap, and the two second ears as claimed. Regarding claim 4, the prior art does not suggest the connector for a lamp as claimed, including the combination of all the claimed elements, the combination including that the attaching device comprises the two hooks, the cap, and the two through holes as claimed. Regarding claim 7, the prior art does not suggest the connector for a lamp as claimed, including the combination of all the claimed elements, the combination including that the attaching device comprises the two hooks and the two loops as claimed.
